MOGUNTIA FOOD GROUP opens new Customer Delivery Center with optimized layout and expanded capacity in order business growth.

The MOGUNTIA FOOD GROUP is excited to announce the opening of its new Customer Delivery Centre (CDC), due to the considerable growth the business has experienced. The CDC is located close to the production site in Georgsmarienhütte and provides the perfect opportunity to respond even faster to the growing needs of our customers and to continue to deliver on our customer centric commitment.

This new centre is a spacious **10,000 m²** and has the advantage of creating even more space with its **expandable storage space for 4,000 to 6,000 pallets** with its high-bay racking. The new centre has five loading docks to ensure both smooth delivery and pickup. Through this expansion, the MOGUNTIA FOOD GROUP demonstrates its ambition for continued growth.

The CDC is conveniently located to the local infrastructure (with **access to the A33, A30 and A1 motorways**), providing quick and efficient access to customers and suppliers. In addition to this, it is located in close proximity to the Georgsmarienhütte production site (5 minutes by car)

The spacious office areas attached to the CDC provide ample space for employees and support a productive working environment. There is also the option to expand the warehouse to accommodate even further growth. The large warehouses have plenty of natural sustainable lighting and are optimally designed for material flow to enable fast and efficient order picking.

In addition to the already mentioned advantages of the new location, the new CDC also enables the **integration of other warehouse locations**. With this consolidation, the material flows of the MOGUNTIA FOOD GROUP can be bundled and structured even more efficiently. Everything under the aspect of an even better customer centricity!
